## Color scheme

If I could add CSS to this assignment the color scheme would be as follows:

1.All the pages would have the same background color with partitions between the header, footer, and the navigation bar. The navigation bar would have a light green color (#90EE90). I would also like to add a border around the navigation bar and the footer so the page gives us a good clarity of where the main content is. I would also align the items toward center and put bold to the text so that it is easily visible. I would want to add a 10px padding to create some space between the navigation bar and the body.

2.The navigation bar would have a lightest dark grey color #D3D3D3.The contrast between the colors of the navigation bar and the background color display a good and vibrant feeling.

3.The footer will have a light red color #EE9090.I would like to add a 10px padding to the footer so that the footer content is separated from the main body.
